Subject: Q fom Rockefeller's office re: sampling

Linda,

Yesterday, this was in the EOC report from HQ.

Rockefeller's staff is briefing the Senator this afternoon, they would like additional detail on the testing- so can you please ask for an update on this by 2:30pm-anything folks can say?

Additionally, today EPA R3 personnel was scheduled to take split samples along with WV DEP and CEC, the facility's remediation contractor, from the collection trench, a seep behind the secondary containment area, and four monitoring wells down gradient of the tank farm. The Ft. Meade Lab is ready to run the samples (5-7 sample locations). The sampling will depend on the amount of water that has accumulated in the sumps. The samples will be analyzed for MCHM/PPH and total VOCs. This is information that will be included in an EOC Spot Report update later tonight.
